

Autumn Meeting MolecularDiagnostics.be

November 14th 2017, 13:30-17:30

BIP ('huis van het gewest')

Koningsstraat 2-4 - 1000 Brussel

Please register before November 7th on www.moleculardiagnosics.be, after logging in.

Program

Location: BIP, Zinneke

13h30 Welcome and announcements (Lieselot Cnops)

13h35 Introduction of the new instrument directory and updates to the test directory on MolecularDiagnostics.be (Friedel Nollet)

13h45 Introduction of the online forum of MolecularDiagnostics.be (Karl Vandepoele)

14h05 A first glance at the new European IVD legislation: what about in-house testing? (Karl Vandepoele)

14h30 – 17h: Parallel sessions

Parallel session hematology/pathology	Parallel session microbiology
Genetic predispositions to myelodysplastic syndromes and familial acute (myeloid) leukemias: from translational investigation to daily diagnosis workup – Frédéric Lambert, CHU Liège (30')	The BD MAX™ system: bringing molecular microbiology back to the core lab? – Elke Vanlaere, AZ Sint-Lucas Ghent (30')
Introduction of MGMT and other methylation tests in cancer diagnostics - Karen Zwaenepoel, UZA (30')	Multiplex molecular panels for diagnosis of infectious gastroenteritis: The BioFire FILMARRAY®Gastrointestinal Panel (CAT study) – Katrien Hoet, Ziekenhuis Oost-Limburg (30')
Coffee break (15h30 -16h00)	
Targeted next-generation sequencing using a multi-gene panel in myeloid neoplasms: implementation in clinical diagnostics - Guy Froyen, Jessa Hospital (30')	Evaluation of the ePlex Respiratory Pathogen and Blood Culture identification Panels (title TBC) – Daniel Huang, CHU UCL Namur (30')
Fusion detection by use of next-generation sequencing in the diagnostic work-up of solid tumors - Marie Le Mercier, Hôpital Erasme (30')	Identification of bacteria in clinical samples using the UMD Universal kit (Molzym) – Anne Vankeerberghen, OLVZ Aalst (30')

17h Drinks @ KWINT (Kunstberg 1, 1000 Brussel)
